SKILLS

Back End Development: Java • Spring Boot • MySQL • PHP • REST APIs • JPA (Hibernate) • JWT Authentication • CRUD Operations • Microservices

Front End Development: React.js • TypeScript • JavaScript • HTML • CSS • Tailwind CSS • Bootstrap • Axios/Fetch API • Responsive Design

Tools & Misc: Docker • Git • JDBC • JUnit • Postman • LAMP • OOP • Agile/Kanban • CI/CD • Prometheus • Grafana

EXPERIENCE

Technical Support Specialist | Rogers Communications

Jan 2022 – Sep 2023 | Kelowna, BC (Remote)

- Resolved complex issues involving network connectivity, software glitches, and hardware malfunctions, handling about 30 tickets per day while driving high CSAT.
- Documented problems and resolutions in the internal knowledge base, improving future troubleshooting accuracy and reducing repeat incidents.
- Trained & mentored 4 new employees on diagnostic tools, escalation procedures, and best practices, strengthening overall team efficiency.

PROJECTS

TA Allocation and Management System (UBC)

(May – Aug 2025)

React, TypeScript, Spring Boot, Tailwind CSS, MySQL

- Built microservices (5) based full-stack platform using Spring Boot REST APIs and React to automate TA allocation, reducing manual workload by ~95%
- Implemented role-based access, availability by FullCalendar with dynamic updates.
- Used JPA (Hibernate) for persistence and JWT auth for secure access.
- Containerized services with Docker and observability using Prometheus + Grafana
- UBC's 1st Choice Project for functionality, performance, and usability

E-Commerce Electronics Web Application

(Jan – Apr 2025)

HTML, CSS, JavaScript, Bootstrap, MySQL

(Visit: mvelectronics.online)

- Built full-stack e-commerce platform with product catalog, cart, checkout, and admin order management
- Developed PHP backend with MySQL CRUD operations & AJAX-powered live updates
- Improved checkout responsiveness and page load performance by ~30% through frontend and query optimization
- Designed scalable database schema and backend logic to support concurrent users

Student Registration System

(Sept – Dec 2024)

Java, MySQL, JDBC, NetBeans

- Built Java-based student registration system using JDBC with MySQL backend for enrollment and academic record management
- Implemented CRUD workflows with real-time input validation
- Designed relational database schema and optimized queries for reliable record storage and retrieval

EDUCATION

University of British Columbia (UBC)

Bachelor of Science, Computer Science (2025)

Dean's List | 9.2/10

Okanagan College

Associate of Science, Mathematics & Statistics (2021)

Dean's List | GPA: 8.3/10

HONORS & AWARDS

• Dean's List:

Okanagan College & UBC.

• Client Project Recognition: TA Allocation System ranked **1st Choice** by UBC.

• **Merit List:** Topped the state of Punjab, India in Secondary Education with 96.67%

• **Full Scholarship:** Academic excellence at Meritorious School, Bathinda.

COURSEWORK

- DSA (A)
- Databases (A+)
- Software Eng (A+)
- Data Analytics (A+)
- Web Programming (A+)
- Image Processing (A+)
