PROFESSIONAL SUMMARY

Full-stack software developer with a BSc in Computer Science from UBC, specializing in Java, Spring Boot, React.js, REST APIs, and microservices architecture. Proven ability to deliver scalable, production-ready web applications, including a UBC 1st Choice project that reduced manual workload by 95%. Experienced in Agile environments with a strong command of CI/CD, Docker, MySQL, and modern front-end frameworks.

TECHNICAL SKILLS

Back-End Development: Java, Spring Boot, PHP, REST APIs, JPA (Hibernate), JWT Authentication, CRUD Operations, Microservices

Front-End Development: React.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, Axios/Fetch API, Responsive Design

Databases: MySQL, Relational Database Design, Query Optimization

Tools & Practices: Docker, Git, JUnit, JDBC, Postman, LAMP, OOP, Agile/Kanban, CI/CD, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

Technical Support Specialist | Rogers Communications Jan 2022 – Sep 2023 | Kelowna, BC (Remote)

- Resolved ~30 complex technical tickets per day involving network connectivity, software, and hardware issues, maintaining high customer satisfaction (CSAT) scores.
- Documented troubleshooting resolutions in the internal knowledge base, improving team accuracy and reducing repeat incidents.
- Trained and mentored 4 new employees on diagnostic tools, escalation procedures, and best practices, strengthening overall team efficiency.

PROJECTS

TA Allocation and Management System – UBC May – Aug 2025

React, TypeScript, Spring Boot, Tailwind CSS, MySQL, Docker, Prometheus, Grafana

- Architected a microservices-based (5 services) full-stack platform using Spring Boot REST APIs and React.js to automate TA allocation workflows, reducing manual workload by ~95%.
- Implemented role-based access control (RBAC), dynamic availability scheduling via FullCalendar, JPA (Hibernate) for data persistence, and JWT authentication for secure access.
- Containerized all services with Docker; integrated observability stack with Prometheus and Grafana for real-time monitoring.
- Ranked UBC's 1st Choice Project out of all capstone submissions for functionality, performance, and usability.

E-Commerce Electronics Web Application Jan – Apr 2025

HTML, CSS, JavaScript, Bootstrap, PHP, MySQL | Live: mvelectronics.online

- Built a full-stack e-commerce platform with product catalog, shopping cart, checkout flow, and admin order management dashboard.
- Developed a PHP backend with MySQL CRUD operations and AJAX-powered live updates; improved checkout responsiveness and page load speed by ~30% through frontend and query optimization.
- Designed scalable relational database schema and backend logic to support high-concurrency user sessions.

Student Registration System Sept – Dec 2024

Java, MySQL, JDBC, NetBeans

- Built a Java-based student registration and academic records management system using JDBC with a MySQL backend.
- Implemented full CRUD workflows with real-time input validation; designed optimized relational database schema for reliable data storage and retrieval.

EDUCATION

Bachelor of Science, Computer Science – University of British Columbia (UBC) 2025

Dean's List | GPA: 9.2/10 | Relevant Coursework: Data Structures & Algorithms (A), Databases (A+), Software Engineering (A+), Data Analytics (A+), Web Programming (A+), Image Processing (A+)

Associate of Science, Mathematics & Statistics – Okanagan College 2021

Dean's List | GPA: 8.3/10

HONORS & AWARDS

- UBC Recognition: TA Allocation System ranked 1st Choice by UBC for functionality, performance, and usability.
- Dean's List: Recipient at both Okanagan College and the University of British Columbia.
- Merit List: Topped the state of Punjab, India, in Secondary Education (96.67%).
- Full Academic Scholarship: Awarded for academic excellence at Meritorious School, Bathinda.
